PROJECTS

Note Making App

This project is inspired by Google Keep notes, In which a user adds notes and can edit, delete notes. and the data gets saved locally, So that whenever the user again uses the app the data persists.

- Using React, React Hooks
- Using Local Storage for storing and retrieving data.
- Using different npm packages such as toastify to display notifications.
- Used react-bootstrap for responsive web design.

Sendpay - Landing Page

This Landing page is made for a payment which is made using HTML, CSS, and Bootstrap, The main focus for this project is to make a responsive web design and creating a layout as per the design provided

- HTML,CSS, JavaScript
- Bootstrap
